

The super sleigh

Once upon a time there was a big and muscled Santa Claus named Raoul with his sweet little elf named Sweaty Pie it was the 24th of December almost night at the North Pole in Raoul's garage. Sad

Santa Claus was just going to leave to deliver presents to the children but his sleigh would not work. He does not know what to do and he started panic.

The elf has an idea. <Let's call the small and soft carpenter>. After a moment the carpenter named Sara has arrived at the garage. She made a new sleigh even more cool and awesome than the other one. But she had to hurry up because Raoul will not have time to deliver all the big and very heavy presents to the children of the world. After thirty minutes of hard work and effort the sleigh was absolutely done.

The muscle man could finally deliver presents to all the children in the world in one night they were very happy. And it was a perfect Christmas just like the others.
